Copper core for superior signal transmission and minimized interference. For other related solutions, explore our [Snap Cable for Medical Applications](#) and [Snap Cable for Audio Devices](#), designed for reliable and high-performance connectivity.

Application:

- **Hospital rehabilitation departments:** It is used in various rehabilitation treatment equipment to assist patients in muscle stimulation, nerve function restoration and other treatments.
- **Professional physiotherapy centers:** Provide convenient equipment connection solutions for physiotherapists, and support a variety of physiotherapy projects, such as electro - acupuncture therapy, electro - assisted tuina therapy, etc.
- **Home care:** Facilitate home users to carry out simple physiotherapy and health care on their own, such as relieving muscle pain and promoting blood circulation.
- **Research institutions:** As a connecting wire for experimental equipment, it is used for the collection and analysis of bio - electrical signals in medical research.

.

Certification and Compliance:

This cable meets strict standards to ensure the highest quality and safety levels in the medical field:

- **ISO 13485:** Certification ensures compliance with international standards for medical device quality management systems.
- **ISO 9001:** Ensure that products are manufactured under a sound quality management system.
- **FDA Approved:** The product is registered with the U.S. Food and Drug Administration and meets its medical device standards.
- **CE MDR certification:** Complies with the EU Medical Device Regulation (MDR) to ensure safety and effectiveness for medical use.
