

Our 8-Channel EEG Electrode Cap is tailored for scientific research applications, ensuring consistent signal quality and ease of use. Adhering to the internationally recognized 10-20 System, each electrode position is optimized for accurate EEG data collection. For enhanced signal collection, it can be effectively combined with our [durable EEG lead wires](#) to ensure stable transmission throughout the recording process.

As a trusted China Dongguan manufacturer and supplier, we focus on delivering high-quality EEG accessories with reliable performance and flexible customization options. The cap supports various electrode materials, connector types, and cap sizes, making it highly adaptable for different research environments. Additionally, for applications requiring supplementary monitoring, our [disposable electrode patches](#) offer excellent skin adhesion and low impedance, further improving the quality of EEG signal acquisition.

With strong OEM and ODM capabilities, our Dongguan-based factory ensures fast delivery, strict quality control, and professional service to support global customers in the medical and scientific industries.

Certification and Compliance:

This cable meets strict standards to ensure the highest quality and safety levels in the medical field:

- **ISO 13485:** Certification ensures compliance with international standards for medical device quality management systems.
- **ISO 9001:** Ensure that products are manufactured under a sound quality management system.
- **FDA Approved:** The product is registered with the U.S. Food and Drug Administration and meets its medical device standards.
- **CE MDR certification:** Complies with the EU Medical Device Regulation (MDR) to ensure safety and effectiveness for medical use.
