Product Information:

This DIN 5-Pin Male to Dual 3.5mm Female Snap ECG Spring Coiled Cable is designed for use in medical monitoring systems such as ECG, EMG, TENS, and EMS devices, much like our highly regarded [5Pin Lemo Plastic Plug to 4.0mm Female Electrode Snap Connector ECG Cable](#) that's proven reliable in intensive care units. The spring-style coiled cable allows for flexibility and movement without signal interruption, ideal for both stationary and mobile diagnostic equipment, mirroring the convenient mobility features of our [Type C to 4.0mm Female Snap Cable with 2 Leads Wire](#) used in portable health setups.

The DIN 5-pin male connector ensures stable multi-channel signal transmission, while the two female 3.5mm snap connectors are compatible with standard snap electrode pads, delivering precise bio-signal acquisition.

Manufactured using medical-grade TPU or PVC, the cable offers superior durability, stretchability, and resistance to chemicals or repeated cleaning. As a trusted medical cable factory in Dongguan, China, we offer full customization of connector types, cable lengths, coil tension, and color for OEM/ODM projects, similar to the tailored solutions available for our extensive range of medical cables. The product meets ISO13485 and RoHS compliance for international markets.

Certification and Compliance:

This cable meets strict standards to ensure the highest quality and safety levels in the medical field:

- **ISO 13485:** Certification ensures compliance with international standards for medical device quality management systems.
- **ISO 9001:** Ensure that products are manufactured under a sound quality management system.
- **FDA Approved:** The product is registered with the U.S. Food and Drug Administration and meets its medical device standards.
- **CE MDR certification:** Complies with the EU Medical Device Regulation (MDR) to ensure safety and effectiveness for medical use.
