

Product name	High Quality USB A to 4.0 Electrode Female Snap with Switch Physiotherapy Cable for TENS Machine Therapy Sessions
application	Stimulation machine, physical therapy instrument
length	10cm, 20cm, 50cm, 100cm or customized
color	Black, Gray, white, black and customized
Conductor material	Tinned copper
Package	Individually packaged

Purpose and Application Scenarios

- This physiotherapy cable serves as a connection hub. One end is connected to a power source or signal output device through the USB A interface, and the other end is connected to electrode pads using the 4.0 electrode female snap. It enables functions such as electrical stimulation, pulse massage, and thermal physiotherapy on the human body, effectively promoting blood circulation, relieving muscle fatigue and pain.
- It is widely used in daily home health - care physiotherapy, allowing users to conduct self - treatment in their spare time. It is also suitable for professional rehabilitation physiotherapy centers and the rehabilitation departments of hospitals, providing professional rehabilitation treatment services for patients.

Main features:

- High - quality Interface: [The USB A interface cable](#) features excellent versatility and stability. It can seamlessly connect with various devices equipped with USB output, ensuring stable power and signal transmission.
- Reliable Electrode Snap: The [4.0 electrode female snap cable](#) has been precisely designed and rigorously tested. It connects tightly to the [electrode pads](#) and is not prone to loosening, guaranteeing the stability and effectiveness of current conduction during the physiotherapy process.
- Convenient Switch: The equipped switch is easy to operate. Users can turn the physiotherapy function on or off at any time according to their own feelings, accurately controlling the physiotherapy process.

Certification and Compliance:

This cable meets strict standards to ensure the highest quality and safety levels in the medical field:

- **ISO 13485:** Certification ensures compliance with international standards for medical device quality management systems.
- **ISO 9001:** Ensure that products are manufactured under a sound quality management system.
- **FDA Approved:** The product is registered with the U.S. Food and Drug Administration and meets its medical device standards.
- **CE MDR certification:** Complies with the EU Medical Device Regulation (MDR) to ensure safety and effectiveness for medical use.
