	ISO 13485 & ISO 9001 Certified 4.0 Banana Male to Female Physiotherapy Wire Professional Manufacturing & Supply by Heymed
application	Stimulation machine, physical therapy instrument
length	10cm, 20cm, 50cm, 100cm or customized
color	Black,Gray, white, black and customized
Conductor material	Tinned copper
Package	Individually packaged

Purpose and Application Scenarios

- **Professional Physiotherapy Clinics:** In professional physiotherapy clinics, the adaptable **banana plugs** can be quickly and stably inserted into the equipment ports, providing a stable connection for precise electrostimulation treatments. This helps doctors carry out treatment programs such as neuromuscular electrical stimulation.
- **Rehabilitation Centers:** Inside rehabilitation centers, this physiotherapy wire can be used to connect different modules in rehabilitation equipment, ensuring stable current transmission and assisting patients in conducting targeted muscle strength recovery training to accelerate the rehabilitation process.
- **Home Physiotherapy:** For home users, when using small household electrotherapy devices to relieve muscle soreness and promote blood circulation, users can easily connect it to the device and electrodes.

Main features:

- **High quality Plug Design**: The <u>4.0 banana plugs</u> are adopted, which feature a tight fit and excellent electrical conductivity. The male and female ends are precisely manufactured to ensure a stable connection, effectively reducing signal loss.
- **Durable Cable Material**: High quality cable materials are selected, which have excellent flexibility and wear resistance. They can withstand frequent bending and daily use, ensuring long term stable operation.
- **Safe and Reliable Performance**: Manufactured in strict accordance with international safety standards, it has good insulation performance, effectively preventing the risk of electric leakage and providing safety guarantees for users.

If you need conversion accessories that are compatible with different - sized interfaces during the use of the physiotherapy wire, we have carefully prepared a series of related products for you. For example **Carbon Conductive Silicone rubber Wristband for Tens EMS Simulation Electrode.**

Certification and Compliance:

This cable meets strict standards to ensure the highest quality and safety levels in the medical field:

- **ISO 13485:** Certification ensures compliance with international standards for medical device quality management systems.
- ISO 9001: Ensure that products are manufactured under a sound quality management system.
- **FDA Approved:** The product is registered with the U.S. Food and Drug Administration and meets its medical device standards.
- **CE MDR certification:** Complies with the EU Medical Device Regulation (MDR) to ensure safety and effectiveness for medical use.

Company information. Overview

FAQ

Q1: Can I start a sample order before ordering more?

A: Of course, Heymed will provide free samples if we have them in stock, customized samples require installation fees. Thank you for asking us for samples to check our quality.

Q2: What payment methods do you accept?

A: PayPal, T/T, bank transfer, Western Union and L/C

Q3: How does your factory do in terms of quality control?

Answer: Quality is priority. The QC department with professional quality assurance experts attaches great importance to quality control from beginning to end. Our factory has obtained Rohs, SGS, CE FCC, ISO9001:2008 certification. ETC
