

Our sintered Ag/AgCl electrodes are manufactured using high-purity columnar silver chloride powder to ensure optimal porosity and long-term electrochemical stability. These electrodes offer low impedance, excellent biocompatibility, and consistent signal output, making them ideal for ECG, EEG, and EMG monitoring systems used in both clinical and wearable medical devices.

As a professional **manufacturer and supplier based in Dongguan, China**, we provide flexible customization options in electrode size, shape, and connector type to meet a wide range of biomedical applications. In addition to electrodes, we also offer [electrode pads](#) compatible with various monitoring systems, and [custom medical cables](#) that ensure secure, low-noise signal transmission.

Whether you're sourcing components for diagnostic equipment or developing wearable health tech, our Dongguan factory delivers reliable OEM/ODM services and consistent global supply for B2B clients.

### **Certification and Compliance:**

This cable meets strict standards to ensure the highest quality and safety levels in the medical field:

- **ISO 13485:** Certification ensures compliance with international standards for medical device quality management systems.
- **ISO 9001:** Ensure that products are manufactured under a sound quality management system.
- **FDA Approved:** The product is registered with the U.S. Food and Drug Administration and meets its medical device standards.
- **CE MDR certification:** Complies with the EU Medical Device Regulation (MDR) to ensure safety and effectiveness for medical use.
